

Manage your Hourly Rounding using our **iPad 4Ps program**

- keep track of each patient's responses
- dictate your findings in realtime at the bedside
- document each patient's needs and your resolution for service recovery
- generates a quick review of previous rounds for analysis of each patient's progress

Results:

- Patient is less stressed resulting in **better managed patient care**
- Nurse will be more efficient, less stressed, and have increased productivity

Our program includes:

- iPad mini with voice dictation feature
- Wireless earbuds
- iPad 4Ps program

**Findings can
be exported
to your EMR!**
